

Food For The Poor, Inc.

NOTES FROM THE FIELD

To: Delane Bailey

Re: Project 1925H - Bondeau Broiler Project

The chicken coop structure has been completed. The feeders and drinkers have been delivered along with 1,000 day - old chicks and 40 bags of feeds. The agriculture team distributed the vitamins and antibiotics for the animals. As of this writing, there is zero mortality rate and there are plans to vaccinate the chicks this week.

Please see the project development in the photos below.
